

This file created with pdftex using pdfstartlink
inspired on standard examples, the vpe.txt document, and the thread pdftex Launching
this link tries to use parameter in filename `wired.sh start`
this link tries to use full path `/usr/bin/wired.sh start`
this link launches, if parameters are supported, `wired.sh start`
this link launches, if parameters and absolute paths are supported, `/usr/bin/wired.sh start`
