The Add Process Automatic Adding

Here you can control how calibre will read metadata from the files you add to it. calibre can either read metadata from the contents of the file, or from the filename.

Read metadata from file contents rather than file name

Swap author first and last name

When using the "Copy to library" action to copy books between libraries, preserve the date

When using the "Copy to Library" action check for duplicates with the same title and author

Automatically convert added books to the current output format Mark newly added books

Automerge added books if they already exist in the calibre library: Ignore duplicate incoming formats

Tags to apply when adding a book:

Configure metadata from file name

Set a regular expression pattern to use when trying to guess ebook metadata from filenames.

A [tutorial](#) on using regular expressions is available.

Use the Test functionality below to test your regular expression on a few sample filenames (remember to include the file extension). The group names for the various metadata entries are documented in tooltips.

Regular expression

(?P<title>.+)(?P<author>[^\s]+)

Literature's grandest evocation of life's journey, at once an ageless human story and an individual test of moral endurance, Homer's ancient Greek epic The Odyssey is translated by Robert Fagles with an introduction and notes by Bernard Knox in Penguin Classics. When Robert Fagles' translation of The Iliad was published in 1990, critics and scholars alike hailed it as a masterpiece. Here, one of the great modern translators presents us with The Odyssey, Homer's best-loved poem, recounting Odysseus' wanderings after the Trojan War. With wit and wit, the man of twists and turns meets the challenges of the sea-god
