iLiad Patch Notes Version 2.6.1

These Software Patch Notes cover an overview of what's new and the download and installation instructions for the software patch 2.6.1 for the iLiad.

1 Overview Software patch v2.6.1

This software patch v2.6.1 is part of an ongoing process to improve the overall performance to ensure an even better electronic reading experience for our customers. We recommend that all users install this patch.

1.1 *Content Browser*

- Bug fixed where a manifest container was created on the internal file system
- Bug fixed where the shutdown screen was not shown when a viewer was active
- Bug fixed where a double click on a file would cause the iLiad to crash
- Bug fixed where the Up key to exit application could crash the iLiad.

1.2 *PDF Viewer*

- Modified the Up key to exit immediately, long press still goes to the first page
- Restored hyperlink support (internal links)
- Landscape PDFs are now displayed properly again
- Keyboard icon active to allow the opening of password protected PDFs

1.3 *iLiad Settings*

- Sound on/off now works

1.4 *Wireless connectivity*

- Improved support for some non-broadcasting SSIDs

2 Download and Installation instructions for software patch v2.6.1

In order to download this patch and any future software releases you will need to create a user account to connect to iDS.

Note: These download and installation instructions are only applicable for software version 2.6. If you are running an older software version please consult the previous release notes which can be found here:

<http://www.irextechnologies.com/downloads/docs>.

2.1 *How to create an account:*

- Go to <https://myirex.irexnet.com/createuser.php> and fill in your e-mail address.
- You will receive an automatic e-mail with a password in your e-mail inbox.
- Configure the *iLiad Settings* on your iLiad and insert your e-mail address and the password you received.
- You are now ready to connect to iDS.

If you have an account you can download the latest software release from the iDS (iRex Delivery Service).

Note: Make sure that your iLiad is fully charged or connected to the power plug before starting the download).

2.2 How to download and install the latest software patch:

- Connect to iDS by pressing the connect key of your iLiad for 2 seconds.
- After connecting to the server you will get a message: ***Downloading Software Patch v2.6.1*** and the progress of the download.
- When the download is complete you return to the ***Download History***.
- Switch the iLiad off and wait for the screen to turn white. The patch is now installed.
- Switch the iLiad back on again and you can continue to work with the iLiad.
