Welcome to ABC Amber CHM Converter

© 2003 - 2008 ProcessText Group. All rights are reserved.

Homepage: <http://www.processtext.com>

Email: processtext@thebeatlesforever.com

Most likely, ABC Amber CHM Converter is a batch decompiler for Compiled Windows HTML Help files (*.chm) you've been searching for a long time. Taking CHM files or CHM ebooks, it will convert them to any document format you wish - PDF, RTF, HTML, DOC, TXT, etc.

It creates contents with bookmarks (in **RTF**, **PDF**, **DOC** and **HTML**), extracts pictures, maintains hyperlinks. In other words, you can produce a new hypertext system in most popular formats.

Key features of conversion to PDF using ABC Amber CHM Converter program include 40/128 bits PDF encryption, advanced PDF security options, page size and page orientation support, resolution mode, compression mode, and more.

Also you can use this program as a **chm2web** and **chm2hlp** tool.

As all "ABC Amber" products, it's really easy as ABC and powerful as Amber. Currently our software supports more than 50 languages.

No doubt this powerful tool helps you save your time and reduce your efforts.

User License Agreement

© 2003 - 2008 ProcessText Group. All rights are reserved.

Homepage: <http://www.processtext.com>

Email: processtext@thebeatlesforever.com

This user license agreement (the AGREEMENT) is an agreement between you (individual or single entity) and the author (ProcessText Group), for ABC Amber CHM Converter program (the SOFTWARE) that is accompanying this AGREEMENT.

The SOFTWARE is the property of the author and is protected by copyright laws and international copyright treaties. The SOFTWARE is not sold, it is licensed.

LICENSED VERSION

The LICENSED VERSION means a Registered Shareware Version (using your personal registration key) or an original fully working version of the SOFTWARE. If you accept the terms and conditions of this AGREEMENT, you have certain rights and obligations as follow:

YOU MAY:

1. Install and use one copy of the SOFTWARE on a single computer.
2. Install a second copy of the SOFTWARE on a second computer only if you are the main user of this computer (home computer or laptop for example).
3. Install the SOFTWARE on another computer only if you change of main workstation. In such a case you must uninstall the software from the old computer.
4. Use the SOFTWARE via a network, only if you have purchased an adequate number of licenses. The number of users must not exceed the number of licenses you have purchased.
5. Make a copy of the SOFTWARE for archival purposes only.

YOU MAY NOT:

1. Copy and distribute the SOFTWARE or any portion of it.
2. Sublicense, rent, lease or transfer your personal registering key.
3. Sublicense, rent or lease the SOFTWARE or any portion of it.
4. Decompile, disassemble, reverse engineer or modify the SOFTWARE or any portion of it.
5. Copy the documentation accompanying the SOFTWARE.

WARRANTY DISCLAIMER

The SOFTWARE is supplied "AS IS". The author disclaims all warranties, expressed or implied, including, without limitation, the warranties of merchantability and of fitness for any purpose. The user must assume the entire risk of using this SOFTWARE.

DISCLAIMER OF DAMAGES

The author assumes no liability for damages, direct or consequential, which may result from the use of this SOFTWARE, even if the author has been advised of the possibility of such damages. Any liability of the seller will be limited to refund the purchase price.

Exporting and importing documents

© 2003 - 2008 ProcessText Group. All rights are reserved.

Homepage: <http://www.processtext.com>

Email: processtext@thebeatlesforever.com

To import CHM file, simply click "Open" button and select file.

To export it (to convert it), select file format and click "Save As" button.

It's really easy as ABC!

Also CHM Converter supports a **batch conversion**:

1. Click "Open folder" button
2. Select a folder with CHM files
3. Click "Find Files" button
4. If CHM files are found in that folder(s), select required files and click OK
5. Select file format to export
6. Click "Save Folder" button
7. Select a folder to save
8. Click "Start" button
9. Sit back and enjoy

[FAQ](#)

HTML

© 2003 - 2008 ProcessText Group. All rights are reserved.

Homepage: <http://www.processtext.com>

Email: processtext@thebeatlesforever.com

HTML

Short for HyperText Markup Language, the authoring language used to create documents on the World Wide Web. HTML is similar to SGML, although it is not a strict subset.

HTML defines the structure and layout of a Web document by using a variety of tags and attributes. The correct structure for an HTML document starts with <HTML> and ends with </HTML>. All the information you'd like to include in your Web page fits in between the tags.

There are hundreds of other tags used to format and layout the information in a Web page. Tags are also used to specify hypertext links. These allow Web developers to direct users to other Web pages with only a click of the mouse on either an image or word(s).

RTF

© 2003 - 2008 ProcessText Group. All rights are reserved.

Homepage: <http://www.processtext.com>

Email: processtext@thebeatlesforever.com

RTF represents Microsoft Corporation's Rich Text Format. The Rich Text Format standard is a method of encoding formatted text and graphics for easy transfer between MS-DOS, Windows, OS/2, and Apple Macintosh applications. Additional information can be found at: <http://www.microsoft.com>

ANSI

© 2003 - 2008 ProcessText Group. All rights are reserved.

Homepage: <http://www.processtext.com>

Email: processtext@thebeatlesforever.com

ANSI

Acronym for the American National Standards Institute. Founded in 1918, ANSI is a voluntary organization composed of over 1,300 members (including all the large computer companies) that creates standards for the computer industry. For example, ANSI C is a version of the C language that has been approved by the ANSI committee. To a large degree, all ANSI C compilers, regardless of which company produces them, should behave similarly.

In addition to programming languages, ANSI sets standards for a wide range of technical areas, from electrical specifications to communications protocols. For example, FDDI, the main set of protocols for sending data over fiber optic cables, is an ANSI standard.

Unicode

© 2003 - 2008 ProcessText Group. All rights are reserved.

Homepage: <http://www.processtext.com>

Email: processtext@thebeatlesforever.com

Unicode

A standard for representing characters as integers. Unlike ASCII, which uses 7 bits for each character, Unicode uses 16 bits, which means that it can represent more than 65,000 unique characters. This is a bit of overkill for English and Western-European languages, but it is necessary for some other languages, such as Greek, Chinese and Japanese. Many analysts believe that as the software industry becomes increasingly global, Unicode will eventually supplant ASCII as the standard character coding format.

Unicode provides a unique number for every character, no matter what the platform, no matter what the program, no matter what the language. The Unicode Standard has been adopted by such industry leaders as Apple, HP, IBM, JustSystem, Microsoft, Oracle, SAP, Sun, Sybase, Unisys and many others. Unicode is required by modern standards such as XML, Java, ECMAScript (JavaScript), LDAP, CORBA 3.0, WML, etc., and is the official way to implement ISO/IEC 10646. It is supported in many operating systems, all modern browsers, and many other products. The emergence of the Unicode Standard, and the availability of tools supporting it, are among the most significant recent global software technology trends.

PDF: Adobe Acrobat

© 2003 - 2008 ProcessText Group. All rights are reserved.

Homepage: <http://www.processtext.com>

Email: processtext@thebeatlesforever.com

Short for Portable Document Format, a file format developed by Adobe Systems. PDF captures formatting information from a variety of desktop publishing applications, making it possible to send formatted documents and have them appear on the recipient's monitor or printer as they were intended. To view a file in PDF format, you need Adobe Acrobat Reader, a free application distributed by Adobe Systems.

ABC Amber CHM Converter can be run from a command line with parameters. This is very useful for performing conversions automatically.

Usage:

"C:\Program Files\ABC Amber CHM Converter\abcchm.exe" ["SourceFile"] ["DestinationFile"]
[DestinationIndex]

or

"C:\Program Files\ABC Amber CHM Converter\abcchm.exe" ["SourceFolder"] ["DestinationFolder"]
[DestinationIndex]

where

SourceFile, **DestinationFile** - files for import and export

SourceFolder, **DestinationFolder** - folders for import and export (batch conversion, available since v2.09)

DestinationIndex:

0 - PDF
1 - HTML (single file)
2 - HTML (web-site)
3 - RTF
4 - HLP
5 - TXT (ANSI)
6 - TXT (Unicode)
7 - MS Word
etc.

For example:

"C:\Program Files\ABC Amber CHM Converter\abcchm.exe" "C:\Program Files\ABC Amber CHM Converter\Manual\abcchm.chm" "C:\ABC\abcpdf.pdf" 0

or

"C:\Program Files\ABC Amber CHM Converter\abcchm.exe" "C:\CHM Files\" "C:\ABC\" 0
(batch conversion)
