## Problem with Old Data (I think).

This is the status of the Calibre Library in my OneDrive BEFORE trying to The Liar add to device (Amazon Paperwhite brand new for my wife's birthday)

The Law is a Lady (2361)	18/05/2021 18:46	File folder
The Liar (2187)	18/05/2021 18:46	File folder
The Lost (2074)	18/05/2021 18:46	File folder

This is what I see in the Calibre Library in Calibre

135	Lessons Learned	Nora Robe...	18 May 2021	0.4		Silhouette	Jun 1986
136	The Liar	Nora Robe...	18 May 2021	1.2		Penguin P...	Apr 2015
137	A Little Fate	Nora Robe	18 May 2021	0.7		Penguin Gr	Feb 2010

I try to add to device and I get this error which says there are no suitable formats available

This is the view of the Calibre Library in OneDrive AFTER trying to Add to Device:

The Law is a Lady (2361)	18/05/2021 18:46	File folder
The Liar (1170)	19/05/2021 13:22	File folder
The Liar (2187)	18/05/2021 18:46	File folder
The Lost (2074)	18/05/2021 18:46	File folder

The NEW folder (1170) has zero content, but it is this one that has been magically created by Calibre (I assume).

The folder 2187 has this content:

b (D:) > OneDrive > Calibre library > Nora Roberts > The Liar (2187)
