(54) Device with graphics dependent on the environment and method therefor

(57) The invention relates to a device with graphics that depend on the environment, particularly a mobile device such as a mobile phone with graphics that change in dependence of signals registered by a camera. The invention also relates to a method for controlling changeable graphics of a graphical interface in such a device. Thus, the invention provides a device (1) comprising

a display (2) for showing information (3) related to the operations of the device, a control unit for controlling the operations of the device including changeable graphics of a graphical interface of the display (2), and further comprising or being connectable to a camera. The control unit is adapted to receive picture information from the camera and using the picture information in order to affect the graphics.
