

Uploading from the Korean Samsung Site...excuse the poor translations!

Figure 1 select the last tab [downloads]

Figure 2 select third tab [updates]

Figure 3 select recent update – august 23rd – 1012.0

Figure 4 download 1012.0 zip...and then save it. Usually the place to store the firmware is in the downloads folder – and when you plug in your sne-60, drag the file to the firmware update folder. Once you've ejected the device, it should sync instantly.
