Mobile Read Times

This is the first publication of the Times

We'd just like to say hi everyone, and thanks for reading our new newspaper! We are all open to suggestions from the readers you can E-mail us at mobiletimespaper@gmail.com for suggestions and items that you think are newsworthy. Or if you see any mistakes in our paper please contact us to tell us what they are, so we can make the paper better.

The current members of the team are:TheTerminator,KindleKitten, Mortis,Alexander Turcic,DixieGal and Taming.

April book club nominations

The April book club read is ***"Hal Spacejock #1"*** by Simon Haynes. This is the description courtesy of Amazon.com....Don't kill me for using Amazon!: **"A beautiful and mysterious female passenger, a loony inventor with a basement full of deadly weapons, and a dangerous run-down teleporter built by a long-lost alien civilization are just some of the challenges facing Hal Spacejock as he fights for survival in the cut-throat interstellar cargo business. Incompetent Hal and his long-suffering metal sidekick, Clunk, are back with another round of interplanetary chaos."** This book is 368 pages in P-book format. If anyone has any comments/reviews on the book you can E-mail it too: mobiletimespaper@gmail.com and we can read it and maybe post it in the next issue of *The Times.*

MobiHandler

Alissa a member of *MobilRead* has introduced a Beta program that helps Windows manage MOBI's for the Kindle. Here is his explanation of the program:

Once installed, this small program helps your Windows Explorer to handle .azw/.mobi/.prc files better; cover images are shown as thumbnails, and you can see the book titles and authors on the list of files. You can also see the Properties of the books. It helps managing Kindle contents on Windows PC, especially when you download a lot of (probably free) .mobi files from the internet (including this site)

It works on Windows XP (SP3) and Windows 7, including 64 bit editions. It should also work on Windows Vista, although I have not tested yet.

The installable file is available on my SkyDrive page at http://cid-88858bc052aea782.office.l...ic/MobiHandler. Download the file "mobihandler-1-0-setup.msi" on the page and double-click on it to install. (The ".msi" part of the file name may not be shown, depending on your settings.) You should review the Readme.txt file before downloading. It is attached below for your convenience.

If you are a programmer, the set of source files is also available on the same page as "mobihandler-1-0-src.zip".

This is the first public release, so you need to expect bugs. Please let me know if you find one. Don't install it on a PC for important purposes. Use it on your own risks.
