Answer

The following procedures describe setting up email on the enTourage or Pocket eDGe using the K-9 email app. Most email accounts can be configured automatically. Make sure you have an active Internet connection before starting these procedures. You will also need to have already established an email account. The enTourage eDGe and Pocket eDGe only provide access to existing email accounts.

Automatic Configuration

1. Select the email icon on the tablet side. The setup wizard opens.
2. Select Next.
3. Enter your full email address and password and press Next . If your account settings are accepted, your email account will be created.

If you are unable to set up your account using this wizard, your email provider may not support either POP3 or IMAP email, or you may need specific settings from your provider. The enTourage or Pocket eDGe will prompt you to Edit details or Continue after you follow the instructions above. If your account settings are not accepted, or you encounter any error message, see this knowledge base article.
