Librerator K4NT Shortcut keys

Most of the K4NT shortcuts are combinations with keyboard key (which I'll call ScreenKB in the following text) and some of the other keys available on K4NT. Combinations are to be pressed one key at a time, and not simultaneously. For example, ScreenKB-Menu means you press ScreenKB, then release it, then press Menu. Cursor keys I'll call fw_up, fw_down, fw_left and fw_right. Fw_press is the button in the middle.

In readers:
- **ScreenKB - Right Next Page** -> next TOC entry
- **ScreenKB - Right Previous Page** -> previous TOC entry
- **ScreenKB - Left Next Page** -> next bookmark
- **ScreenKB - Left Previous Page** -> previous bookmark
- **ScreenKB - fw_up** -> add bookmark
- **ScreenKB - fw_down** -> close book
- **ScreenKB - fw_left** -> manually set BBox
- **ScreenKB - fw_right** -> go to...
- **ScreenKB - fw_press** -> follow link
- **ScreenKB - Menu** - *Zoom & Rotate* in pdf/djvu, *Fonts* in CREReader
- **ScreenKB - Back** -> next jump
- **ScreenKB - Home** -> exit Librerator
