### **OpenInkpot 0.2 Users' Guide**

**Warning: 0.2 is not released yet. This manual describes pre-releases and snapshots!!**

Information about supported hardware and possible installation methods is described in [0.2/InstallationGuide](#).

## **General operation**

### **Navigation in bookshelf**

Use numeric keys to activate the item on screen (to open the book or descend into directory).

Use Ok key to open the main menu.

Use <- key to move to parent directory.

## **SD and internal memory**

To switch between internal memory (Storage - the partition in internal memory used by Hanlin firmware) and SD card use the "Go to" menu.

To activate this menu, press Menu->"Go to" in bookshelf.

## **Reboot or shutdown**

Press Menu->Scripts->Reboot V3 / Shutdown V3.

## **Set clock**

Press Menu->Scripts->Set Clock.

## **Deleting, copying or moving books**

This is available from the context menus.

To open context menu, press + and then number of the book. You'll see the options: delete the book, mark it for copying (copy) or mark it for moving (cut).

To copy/move selected book, navigate to destination directory, open global menu and select "edit -> paste".

Only single file can be moved/copied at the time.

## Bookshelf

- </>** back/forward page
- 1-8** open Nth file ( long press the key to choose the bookreader ) / go to the Nth directory
- 9/0** back/forward page
- +** context menu (pressing **+** then **1** opens context menu for first file on screen, **+** then **2** for second, etc.)
- <-** exit menu or go to parent directory if no menu is open
- OK** open main menu
